Product description

Double solenoid valve MULLER 220V – 90° – 042330

Double solenoid valve A.u.K. Müller – reliability and precision.
We offer an original double solenoid valve, catalog number 042330, manufactured by the global leader in valve technology – A.u.K. Müller. This is a premium component used in advanced milk cooling tank cleaning systems and industrial equipment requiring long-term reliability.

Design and technical specifications
The valve features a dual control mechanism, saving installation space while maintaining full functionality:

- inlet connection: male thread G 3/4", with internal filter screen;
- two independent outlets: 13 mm connections at 90° angle;
- power supply: 220V coils with flat pins for easy connection.

Why choose A.u.K. Müller?
Müller products stand out for durability, high-quality rubber membranes, and resistance to frequent switching, pressure fluctuations, and moisture.

Applications
Milk tank cleaning systems, industrial washing systems, irrigation systems, drinkers, and building automation.
