Eurotanks/Wedholms (Poland) milk cooling tank 18 000 l

Availability	**Always on stock**

Product description

Eurotanks Wedholms milk cooling tank with a capacity of 18 000 liters

Eurotanks Sp. z o.o. is a Polish company that has been manufacturing milk cooling tanks of various types with capacities ranging from 1,000 to 40,000 liters for over 20 years. The company offers open round milk tanks DFOV, DFOH vats, and closed tanks with automatic washing systems DF953/DF95 and D953L/DF95L.

Model DF953 / DF95

This model range includes the largest horizontal tanks available in our portfolio — with capacities from 9,000 to 30,000 liters.

In addition to the features known from the smaller models (DF953/DF95), the DF953L/DF95L series offers optimized solutions for large-scale milking operations.

DF95L tanks feature a flat bottom design, ensuring a large cooling surface area. The DF95L model is equipped with a separate refrigeration unit, while the DF953L can be fitted with an integrated cooling unit.

Please note that the possibility of installing and connecting the refrigeration unit directly behind the tank depends on its dimensions and performance capacity. This is directly related to the milking system used.

For the largest tanks, installation of an integrated refrigeration unit is not possible.
