Product description

GEAR MOTOR SIREM R245D2B

The Sirem R 245 D2B gear motor is a high-quality device designed for JAPY dairy tanks. With a reduction ratio of 1/108 and a stable speed of 25 rpm, it ensures reliable and efficient performance in milk mixing and cooling processes.

The gear motor is powered by 400V 50Hz, making it ideal for installations requiring high performance. The long shaft 1217-2 (16 mm diameter, 92 mm length) includes four holes Ø 5 mm at distances of 10, 29, 65, and 79 mm from the end, providing compatibility and easy installation. The 1217-2 shaft replaces the older 1291-1 version with two holes, offering a more versatile solution.

The product is supplied new and manufactured by the reputable brand Sirem, ensuring durability, precision, and long service life.

Technical data:

- Type: R 245 D2B
- Reduction ratio: 1/108
- Speed: 25 rpm
- Power supply: 400V 50Hz
- Shaft: 1217-2, Ø 16 mm / length 92 mm, 4 holes Ø 5 mm at 10, 29, 65, 79 mm
- Replaces shaft 1291-1 (2 holes at 29 and 80 mm)
- Catalogue number: 030104
- Manufacturer: Sirem
- Condition: New

Applications:

The Sirem R245D2B gear motor is ideal for:

- JAPY dairy tanks requiring precise and uniform mixing,
- cooling installations needing efficient and durable gear motors.
